Anchor Boxes

给定锚框以及偏移量,预测真实边界框

```
torch.Size([1, 2042040, 4]) 可以看到此时生成了200万个锚框
tensor([0.06, 0.07, 0.63, 0.82])
tensor([[0, 1, 2, 0, 2]])
tensor([[0, 0, 0, 0, 0, 1., 1., 1., 1., 1., 1., 1., 1., 0., 0., 0., 0., 1., 1., 1., 1.]])
tensor([[-0.00e+00, -0.00e+00, -0.00e+00, -0.00e+00, 1.40e+00, 1.00e+01, 2.59e+00, 7.18e+00, -1.20e+00, 2.69e-01, 1.68e+00, -1.57e+00, -0.00e+00, -0.00e+00, -0.00e+00, -5.71e-01, -1.00e+00, 4.17e-06, 6.26e-01]])
tensor([[[ 0.00,  0.90,  0.10,  0.08,  0.52,  0.92], [ 1.00,  0.90,  0.55,  0.20,  0.90,  0.88], [-1.00,  0.80,  0.08,  0.20,  0.56,  0.95], [-1.00,  0.70,  0.15,  0.30,  0.62,  0.91]]])
```

预测结果在: anchor_detection_result.jpg
